Test-Taking Tips vii

Unit 1 Number Sense and Operations: Place Value

Practice 1 Three-Digit Whole Numbers Place Value 2
Practice 2 Skip Counting 4
Practice 3 Read and Write Whole Numbers 6
Practice 4 Compare Three-Digit Whole Numbers 8
Practice 5 Round Whole Numbers 10
Unit 1 Review 12

Unit 2 Number Sense and Operations: Addition and Subtraction

Practice 6 Add up to Four Two-Digit Numbers 14
Practice 7 Use the Break-Apart Strategy to Add Three-Digit Numbers 16
Practice 8 Use Drawings and Equations to Add 18
Practice 9 Use Models to Subtract 20
Practice 10 Use Place Value to Add Three-Digit Numbers 22
Practice 11 Use Place Value to Subtract Three-Digit Numbers 24
Unit 2 Review 26

Unit 3 Number Sense and Operations: Multiplication and Division

Practice 12 Multiplication as Repeated Addition 28
Practice 13 Multiply Multiples of 10 30
Practice 14 Division as Equal Sharing 32
Practice 15 Relating Multiplication and Division 34
Practice 16 Division as an Unknown-Factor Problem 36
Practice 17 Multiply Within 100 38
Practice 18 Divide Within 100 40
Unit 3 Review 42

Unit 4 Algebraic Thinking

Practice 19 Commutative and Associative Properties of Addition 44
Practice 20 Commutative and Associative Properties of Multiplication 46
Practice 21 Use the Distributive Property to Multiply 48
Practice 22 Number Patterns 50
Practice 23 Solve Addition and Subtraction Word Problems 52

Practice 24 Solve Multiplication Word Problems 54
Practice 25 Solve Division Word Problems 56
Practice 26 Two-Step Word Problems 58
Unit 4 Review 60

Unit 5 Geometry

Practice 27 Two-Dimensional Shapes 62
Practice 28 Classify Shapes 64
Practice 29 Equal Shares 66
Practice 30 Three-Dimensional Shapes 68
Unit 5 Review 70

Unit 6 Measurement

Practice 31 Measuring Using Nonstandard Units 72
Practice 32 Estimate Length Measurements 74
Practice 33 Compare Lengths 76
Practice 34 Understand Liquid Volume 78
Practice 35 Understand Mass 80
Practice 36 Understand Time 82
Practice 37 Understand Perimeter 84
Practice 38 Using the Square Unit to Understand Area 86
Practice 39 Understanding Area 88
Practice 40 Determining the Area of Rectangles 90
Practice 41 The Distributive Property and Area 92
Practice 42 Decompose Shapes to Determine Area 94
Practice 43 Perimeter and Area 96
Unit 6 Review 98

Unit 7 Data Analysis

Practice 44 Organize Data 100
Practice 45 Understand Bar Graphs and Picture Graphs 102
Practice 46 Scaled Bar Graphs and Picture Graphs 104
Practice 47 Line Graphs 106
Unit 7 Review 108

Answers and Explanations 110
Unit Review Analysis Charts 143

About CASAS Math GOALS 2

The CASAS Math GOALS 2 tests measure basic adult math skills and the ability to make calculations and solve word problems that relate to real-world situations and traditional academic contexts. The CASAS Math GOALS 2 tests include multiple-choice items with four answer options. Basic calculators are allowed. Formulas are provided.

The CASAS Math GOALS 2 tests align with the CASAS Competencies and the Adult Education College and Career Readiness (AE-CCR) Mathematics Standards.

CASAS Math GOALS 2 Level A Blueprint

Level A Content Areas	Percentage of Coverage	CCR Standard Code
Number Sense and Operations	27%	NBT
Algebraic Thinking	21%	OA
Geometry and Measurement	31%	G, MD
Data Analysis	21%	MD

AE-CCR Mathematics Standard Code Key

NBT	Number and Operations in Base Ten
OA	Operations and Algebraic Thinking
G	Geometry
MD	Measurement and Data

Using *A Tutor™ for CASAS Math GOALS 2 Workbook*

A Tutor™ for CASAS Math GOALS 2 Level A: Workbook is designed to be used hand-in-hand with *A Tutor™ for CASAS Math GOALS 2 Level A: Student Edition.* The student editions include instruction and practice for the Adult Education College and Career Readiness standards assessed on the CASAS Math GOALS 2 tests.

Practice Sets

A Tutor™ for CASAS Math GOALS 2 Level A: Workbook includes practice sets for each lesson in *A Tutor™ for CASAS Math GOALS 2 Level A: Student Edition*. Each practice set provides additional items similar to those found on the CASAS Math GOALS 2 Level A test.

- Use the practice sets after completing the corresponding student edition lesson if you feel you need additional practice.
- Use the practice sets after completing the unit reviews in the student edition for areas that need review and improvement.

Unit Reviews

A Tutor™ for CASAS Math GOALS 2 Workbook unit reviews allow you to check your understanding of the skills presented in each unit. Use the corresponding Unit Review Analysis Charts on pages 143–155 to identify strengths and weaknesses. These charts will help you determine if you need to go back to any of the lessons in the student edition before continuing.

Answers and Explanations

A Tutor™ for CASAS Math GOALS 2 Workbook includes explanations for the correct answers to all practice items. After completing a practice set or unit review, check your answers on pages 110–141. For each item answered incorrectly, read the provided explanation to help you rework the item to obtain the correct answer.

Please remember, there may be more than one way to solve a math problem. The explanations show one method of solving a problem. You may have used a different method than the one provided to correctly answer the question.

Test-Taking Tips

- Read the directions and each question very carefully. Read through them word for word.
- Read all the answer options carefully, even if you think you know the answer.
- Answer all the questions. If you cannot find the right answer, rule out the answers that you know are wrong. Then try to figure out the right answer. If you still do not know, make your best guess.
- If you cannot figure out the answer on the paper-and-pencil test, put a light mark by the question number on the answer sheet and come back to it later. Erase your marks before you finish. If you cannot figure out the answer on the online test, flag the item for review.
- Do not change an answer unless you are sure your first answer is wrong. Usually, your first idea is the correct answer.
- If you get nervous, take a few breaths and relax. Then start working again.

Practice 1 Three-Digit Whole Numbers Place Value

2.NBT.1

1 How many bundles of ten are in the number 275?

A. 20 **B.** 27

C. 200 **D.** 275

2 Which statement about the number 100 is *true*?

A. It can be thought of as 10 ones.

B. It can be thought of as 10 bundles of ten.

C. It can be thought of as 100 bundles of ten.

D. It can be thought of as 10 bundles of one hundred.

3 What number is a hundred more than 600?

A. 700

B. 610

C. 601

D. 500

4 How many hundreds are in the number 893?

A. 890

B. 90

C. 89

D. 8

5 How many bundles of ten are in the number 700?

A. 0

B. 7

C. 70

D. 700

6 Which number has 3 hundreds?

A. 139 **B.** 374

C. 439 **D.** 913

7 Which statement about the number 500 is *true*?

A. It can be thought of as 500 bundles of one hundred.

B. It can be thought of as 50 bundles of one hundred.

C. It can be thought of as 50 bundles of ten.

D. It can be thought of as 5 bundles of ten.

8 Which number has 92 bundles of ten?

A. 927

B. 792

C. 592

D. 92

9 Which statement is *true*?

A. The number 3 is a bundle of 3 tens.

B. The number 30 is a bundle of 3 ones.

C. The number 300 is a bundle of 30 tens.

D. The number 300 is a bundle of 30 ones.

10 Which number has 6 hundreds, 2 tens, and 9 ones?

A. 29

B. 62

C. 609

D. 629

11 What are the missing numbers?

100, _____, 300, _____, 500

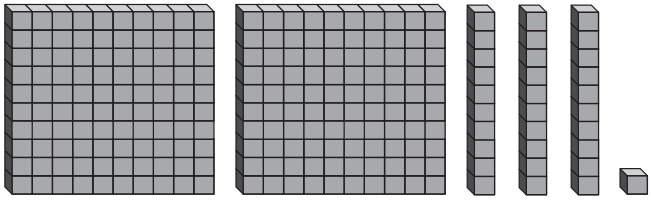
A. 400, 700

B. 400, 600

C. 200, 600

D. 200, 400

Use the model to answer questions 12 through 14.



12 How many bundles of ten does the model represent?

A. 1 **B.** 3

C. 23 **D.** 30

13 Which number does the model represent?

A. 321 **B.** 231

C. 213 **D.** 123

14 Which statement about the model is *true*?

A. The model represents 2 hundreds, 3 tens, and 1 one.

B. The model represents 2 hundreds, 23 tens, and 1 one.

C. The model represents 3 hundreds, 3 tens, and 1 one.

D. The model represents 3 hundreds, 23 tens, and 1 one.

---

15 Which statement about the number 468 is *true*?

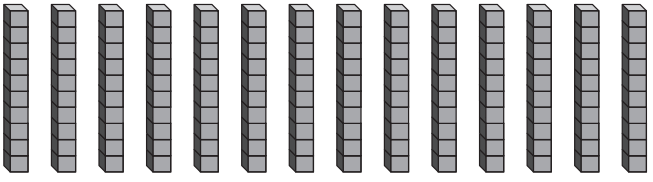
A. The number 468 can be thought of as 4 hundreds, 6 tens, and 8 ones.

B. The number 468 can be thought of as 4 hundreds and 68 tens.

C. The number 468 can be thought of as 4 tens and 68 ones.

D. The number 468 can be thought of as 468 tens.

Use the model to answer questions 16 through 18.



16 Which statement about the model is *true*?

A. An additional 3 tens rods would make another hundred.

B. An additional 4 tens rods would make another hundred.

C. An additional 5 tens rods would make another hundred.

D. An additional 6 tens rods would make another hundred.

17 How many hundreds does the model represent?

A. 0 **B.** 1

C. 2 **D.** 4

18 Which number does the model represent?

A. 14 **B.** 40

C. 140 **D.** 400

---

19 Which number has 5 hundreds and 7 tens?

A. 57

B. 75

C. 507

D. 570

20 How many hundreds are in the number 936?

A. 9

B. 36

C. 93

D. 936

Practice 6 Add up to Four Two-Digit Numbers

2.NBT.6

1 What is the sum of the following?

16
64
+21

A. 90
B. 101
C. 107
D. 111

2 What is the sum of the following?

55 + 43 + 62 =

A. 98
B. 105
C. 150
D. 160

3 What is the sum of the following?

38
83
17
+75

A. 203
B. 213
C. 223
D. 231

4 What is the sum of the following?

59 + 51 + 73 + 34 =

A. 217
B. 173
C. 157
D. 15

5 What is the sum of the following?

52
45
+60

A. 97
B. 157
C. 158
D. 167

6 What is the sum of the following?

83 + 57 + 40 + 34 =

A. 233
B. 225
C. 214
D. 184

7 Kareem, Jenna, and Mark go to a baseball game together. Each ticket costs $43. What is the total cost of the baseball tickets?

A. $172
B. $130
C. $129
D. $86

8 Derek owns a food truck. On Tuesday, he sold 64 burgers, 46 sandwiches, 37 bowls of soup, and 93 drinks. How many items did Derek sell on Tuesday?

A. 147 items
B. 177 items
C. 240 items
D. 250 items

9 Liang travels around the city to practice her photography. She photographs 22 animals, 14 flowers, 88 buildings, and 15 statues. How many photos does Liang take in all?

A. 51 photos
B. 117 photos
C. 124 photos
D. 139 photos

10 Caleb adds these numbers:

14 + 26 + 42 + 28 =

How can Caleb correctly break apart the numbers into tens and ones?

A. 90 + 16
B. 200 + 9
C. 9 tens + 16 ones
D. 9 tens + 20 ones

11 Pedro travels to attend a business meeting and spends $23 on materials. He also spends $42 on meals, $50 on gas, and $88 on a hotel room. How much money does Pedro spend in all?

A. $203

B. $180

C. $153

D. $115

12 On Monday, Sherry ran 11 miles. She ran 21 miles on Wednesday and 17 miles on Saturday. How many miles did Sherry run altogether?

A. 49 miles

B. 38 miles

C. 32 miles

D. 28 miles

13 Chandra competes in a basketball tournament. Her team scores 78 points in the first game, 53 points in the second game, and 39 points in the third game. How many points does Chandra's team score in the tournament?

A. 131 points

B. 141 points

C. 160 points

D. 170 points

14 Sergio harvests 64 peppers, 25 carrots, and 38 tomatoes from his garden. How many vegetables does Sergio harvest?

A. 227 vegetables

B. 127 vegetables

C. 117 vegetables

D. 79 vegetables

15 At the craft fair, Mia sells 16 earrings, 19 necklaces, and 17 scarves. How many items does Mia sell altogether?

A. 52 items

B. 42 items

C. 36 items

D. 32 items

16 Claire deposits a check for $45, a check for $14, and $13 in cash into her savings account. How much money does Claire deposit in all?

A. $59

B. $62

C. $67

D. $72

17 Pranay inventories the materials at a construction site. He counts 44 pipes, 11 wood planks, 67 screws, and 81 nails. How many items does Pranay count in his inventory?

A. 192 items

B. 193 items

C. 203 items

D. 213 items

18 There is a collection of insects on display at a museum. There are 31 moths, 11 grasshoppers, 94 butterflies, and 23 beetles. How many insects are on display?

A. 147 insects

B. 156 insects

C. 159 insects

D. 169 insects

19 At a restaurant, Kashvi spends $18 on her meal. Owen spends $12 and Kikuko spends $24. How much money do they spend in all?

A. $20

B. $36

C. $42

D. $54

20 Paul read 23 pages of a book on Monday. He read 35 pages on Tuesday and 38 pages on Wednesday. On Thursday, Paul read 49 pages. How many pages of his book did Paul read this week?

A. 145 pages

B. 122 pages

C. 107 pages

D. 96 pages

Practice 12 Multiplication as Repeated Addition

3.OA.1

1 Javier buys two containers of hooks. Each container has eight hooks. How many hooks does Javier buy?

A. 2 hooks

B. 8 hooks

C. 10 hooks

D. 16 hooks

2 Each time Todd makes a gift basket, he adds a bundle of five cinnamon sticks. He makes nine gift baskets. Which method uses repeated addition to find the total number of cinnamon sticks Todd uses?

A. Draw a 5 by 5 array.

B. Draw a 9 by 9 array.

C. Skip count by 5 five times.

D. Skip count by 5 nine times.

3 Which expression represents the array?

A. 3 + 3 + 3

B. 7 + 7 + 7

C. 3 + 3 + 3 + 3

D. 7 + 3 + 7 + 3

4 What is the value of 9 groups of 3?

A. 3

B. 6

C. 12

D. 27

5 At an archery tournament, Shaquille shoots six arrows each round. He shoots seven rounds during the tournament. How many arrows does Shaquille shoot?

A. 42 arrows

B. 60 arrows

C. 70 arrows

D. 100 arrows

6 Christina sees four patients. She gives each patient two samples of toothpaste. How many samples does Christina distribute? Which equation uses repeated addition to represent the problem?

A. 2 + 4 = 6 samples

B. 4 + 2 + 2 = 8 samples

C. 2 + 2 + 2 + 2 = 8 samples

D. 4 + 4 + 4 + 4 = 16 samples

7 Which sequence of numbers represents skip counting by 100?

A. 10, 20, 30, 40

B. 50, 55, 60, 65

C. 200, 250, 300, 350

D. 600, 700, 800, 900

8 Which multiplication problem represents the following repeated addition problem?

8 + 8 + 8 + 8 + 8

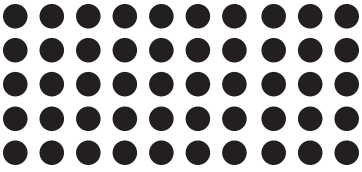
A. 5 × 8

B. 8 × 8

C. 5 × 5

D. 8 × 4

Use the array to answer questions 9 and 10.



9 Which description represents the array?

A. 5 groups of 5

B. 5 groups of 20

C. 10 groups of 5

D. 10 groups of 10

10 Which multiplication problem represents the array?

A. 5×5

B. 5×10

C. 20×5

D. 10×10

---

11 A movie is shown at the local theater four times a day for 12 days. How many times does the theater play the movie?

A. 8 times

B. 16 times

C. 24 times

D. 48 times

12 Asmita's union deducts $6 from each paycheck. She totals her union dues from five paychecks. Which expression represents Asmita's total union dues?

A. $6 + 6 + 6 + 6 + 6$

B. $5 + 5 + 5 + 5 + 5$

C. $5 + 6 + 5 + 6 + 5$

D. $6 + 6 + 6 + 6 + 6 + 6$

13 Farhad has a 10-minute stretching routine. He stretches 10 times each month. How many minutes does Farhad stretch each month?

A. 1 hour

B. 10 minutes

C. 100 minutes

D. 1,000 minutes

14 What is the value of 8 groups of 7?

A. 76

B. 56

C. 48

D. 42

15 John uses 16 support beams in each segment of a wheelchair ramp. There are five segments in the ramp. Which of the following represents the total number of support beams John uses?

A. $5 + 16 = 16 \times 5$

B. $16 + 16 + 16 + 16 = 4 \times 16$

C. $5 + 5 + 5 + 5 + 5 = 5 \times 16$

D. $16 + 16 + 16 + 16 + 16 = 16 \times 5$

16 While hiking, Mallory pauses two times for seven minutes each time. How long does Mallory pause along her hike?

A. 27 min

B. 16 min

C. 14 min

D. 5 min

17 Which equation shows the value of 3 groups of 6?

A. $6 + 6 + 6 = 18$

B. $6 + 6 + 6 = 36$

C. $3 + 3 + 3 = 9$

D. $3 + 3 = 6$

Practice 19 Commutative and Associative Properties of Addition

1.OA.3

1 During his lunch hour, Joel wants to respond to 1 memo and 9 emails. Which expression represents the total number of memos and emails addressed to Joel?

A. 1×9 **B.** 9×1

C. $9 - 1$ **D.** $9 + 1$

2 Amanda bakes bread with 8 ounces of bread flour, 7 ounces of wheat flour, and 5 ounces of rye flour. Which group of addends can Amanda add first to find the total number of ounces of flour in her recipe?

A. $7 + 13$ **B.** $7 + 7$

C. $8 + 5$ **D.** $13 + 5$

3 Over the course of a week, Clark spends 5 hours in meetings, answers emails for 4 hours, and takes calls for 5 hours. He tracks his hours with the expression $5 + 4 + 5$. What is the total number of hours that Clark spends in meetings, answering emails, and taking calls?

A. 14 hours **B.** 15 hours

C. 16 hours **D.** 17 hours

4 Ali compares prices on moisturizer and hair spray. One brand cost $7 for moisturizer and $4 for hair spray. A different brand costs $4 for moisturizer and $7 for hair spray. Which equation correctly compares the total costs of the two brands?

A. $2 \times 7 = 2 \times 4$ **B.** $7 \times 4 = 4 \times 7$

C. $7 + 4 = 4 + 7$ **D.** $7 + 7 = 4 + 4$

5 Ellie reads her son's class schedule. He has 4 class periods before lunch and 5 class periods after lunch. Which expression correctly represents the total number of class periods in her son's schedule?

A. 4×5 **B.** $4 + 4$

C. $5 - 4$ **D.** $5 + 4$

6 Uriah makes a smoothie with 9 blueberries, 8 raspberries, and 1 strawberry. How many total berries are in Uriah's smoothie?

A. 17 berries **B.** 18 berries

C. 19 berries **D.** 20 berries

7 Danielle locates suppliers for copier toner. She finds 3 local suppliers and 14 online suppliers. Danielle writes $14 + 3$ to find the total number of suppliers. Which statement is *true*?

A. The order of the addends does not change the sum.

B. She must multiply to find the total number of suppliers.

C. She must subtract to find the total number of suppliers.

D. She must write $3 + 14$ to represent the total number of suppliers.

8 Lee compares the number of ads in different streaming services. Streaming service A shows 6 minutes of ads before the program and 8 minutes of ads during the program. Streaming service B shows 8 minutes of ads before the program and 6 minutes of ads during the program. Which statement is correct about the total number of minutes of ads?

A. Service A shows more minutes of ads.

B. Service B shows more minutes of ads.

C. Both services have the same number of minutes of ads.

D. The number of minutes of ads cannot be compared.

9 Kwame upgrades his airline ticket so he can have 2 carry-on bags, 1 personal item, and 3 checked bags. Which number correctly completes the equation?

(___ + 1) + 3 = 2 + (1 + 3)

A. 1
B. 2
C. 3
D. 6

10 Sunisa reads the new union agreement. Under the new contract, employees receive 7 days of vacation, 8 days of PTO, and 2 paid sick days. How many total days of vacation, PTO, and sick time does Sunisa have under the new contract?

A. 15 days
B. 16 days
C. 17 days
D. 18 days

11 Ted needs 14 hours of continuing education and 5 hours of in-house training each year to keep his job. Which expression represents the total number of education and training hours Ted needs to keep his job?

A. 5 + 14
B. 5 × 14
C. 14 + 14
D. 14 − 5

12 In his office building, Issac distributes 6 notebooks to the first floor, 9 notebooks to the second floor, and 4 notebooks to the third floor. How many notebooks does Issac distribute in all?

A. 16 notebooks
B. 17 notebooks
C. 18 notebooks
D. 19 notebooks

13 Damon's company provided 6 meals for employees last month and 13 meals this month. Which expression represents the total number of meals provided by Damon's company?

A. 13 ÷ 6
B. 13 × 6
C. 13 + 6
D. 13 − 6

14 Keshaun assigns tasks to his team. There are 5 tasks to be completed by the end of the day, 7 tasks by the end of the week, and 8 tasks by the end of the month. Which number correctly completes the equation?

(5 + ___) + 8 = 5 + (7 + 8)

A. 5
B. 6
C. 7
D. 8

15 Mel reads her paystub. She pays $3 in local taxes, $5 in state taxes, and $7 in federal taxes. What is the total amount of taxes that Mel pays?

A. $14
B. $15
C. $16
D. $17

16 The dress code at the restaurant where Lakisha works requires employees to wear 3 items of flair on their suspenders and 5 items of flair on their aprons. Which expression represents the total number of items of flair that Lakisha must wear?

A. 3 + 3
B. 5 + 3
C. 5 + 5
D. 8 + 3

17 Saquon gives a coworker directions on how to get to the operations plant from the administration building. The plant is 6 miles west and then 9 miles on the highway and 1 mile north. How many total miles is the operations plant from the administration building?

A. 15 miles
B. 16 miles
C. 17 miles
D. 18 miles

Practice 27 Two-Dimensional Shapes

2.G.1

1 How many sides and angles does a pentagon have?

A. 3 sides and 3 angles

B. 4 sides and 4 angles

C. 5 sides and 5 angles

D. 6 sides and 6 angles

2 Which of these correctly matches the shape with the name?

A. circle –

B. triangle –

C. hexagon –

D. rectangle – 
3 Chidi is repairing a chair and uses a nut for a bolt as shown. What shape is the nut?

A. hexagon **B.** pentagon

C. quadrilateral **D.** rectangle

4 Dericia looks for a wheelchair-accessible parking spot. She parks in a spot with the sign shown. What shape is the wheel?

A. circle **B.** hexagon

C. triangle **D.** rectangle

Use the information and figures to answer questions 5 through 7.

A piece of paper has one edge folded back as shown in Figure A. Another piece of paper has a corner removed as shown in Figure B.

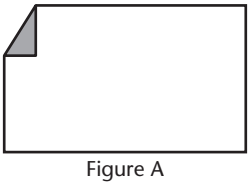


Figure A

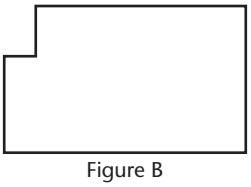

Figure B

5 Which word describes the outside shape of Figure A, the paper with the folded edge?

A. circle

B. square

C. rectangle

D. pentagon

6 Which word describes the shape of the folded edge in Figure A?

A. square

B. triangle

C. pentagon

D. hexagon

7 Which word describes the shape of Figure B, the paper with the edge removed?

A. square

B. rectangle

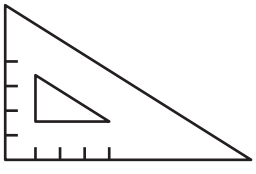
C. hexagon

D. pentagon

8 Notah is waiting to see his doctor for his yearly exam. In the exam room, he sees a "No cell phone" sign posted. What shape is the sign?

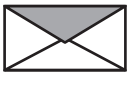
A. square
B. circle
C. triangle
D. quadrilateral

9 Hialeah uses the drafting tool shown to draw blueprints at work. What shape is the drafting tool?



A. square
B. triangle
C. hexagon
D. pentagon

Use the drawing of an envelope to answer questions 10 and 11.



10 Which word describes the outside of this shape?

A. circle
B. square
C. rectangle
D. hexagon

11 Which word describes the shaded shape on the envelope?

A. square
B. hexagon
C. rectangle
D. triangle

---

12 Which shape does *not* belong in the group?

A.

B. 
C. 
D.

13 This road sign warns drivers that roads are slippery when wet. What is the shape of the road sign?

A. circle
B. quadrilateral
C. triangle
D. rectangle

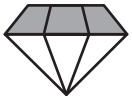
Use the information to answer questions 14 through 16.

Koa designs a new logo for his business cards.

14 Which word describes the outside shape of the logo?

A. hexagon
B. rectangle
C. square
D. pentagon

15 Which word describes the shaded shapes in the top part of the logo?



A. triangles
B. squares
C. quadrilaterals
D. rectangles

16 Which word describes the shaded shapes in the bottom part of the logo?

A. triangles
B. circles
C. squares
D. pentagons

Practice 31 Measuring Using Nonstandard Units

1.MD.2

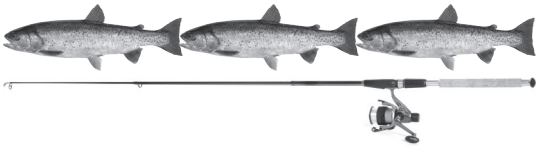
1 Measure the width of the window using pencils. About how many pencils wide is the window?

A. 1 pencil
B. 2 pencils
C. 3 pencils
D. 4 pencils

2 Measure the length of the arrow using squares. About how many squares long is the arrow?

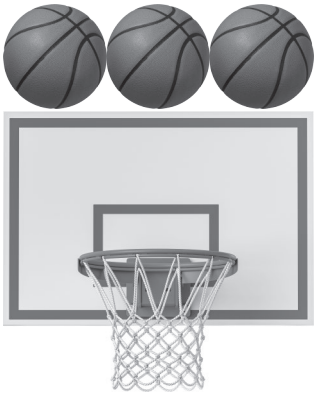
A. 12 squares
B. 11 squares
C. 10 squares
D. 13 squares

3 Measure the fishing pole using the fish shown. About how many fish long is the fishing pole?



A. 4 fish
B. 3 fish
C. 2 fish
D. 1 fish

4 Measure the width of the basketball backboard using basketballs. About how many basketballs wide is the basketball backboard?



A. 2 basketballs
B. 3 basketballs
C. 4 basketballs
D. 5 basketballs

5 Measure the diameter of the soccer ball using whistles. How many whistles does it take to measure the diameter of the soccer ball?

A. 3 whistles
B. 4 whistles
C. 5 whistles
D. 6 whistles

6 Measure the height of the book using playing cards. How many playing cards tall is the book?

A. 1 playing card

B. 2 playing cards

C. 3 playing cards

D. 4 playing cards

7 Measure the length of the bicycle using helmets. How many helmets long is the bicycle?

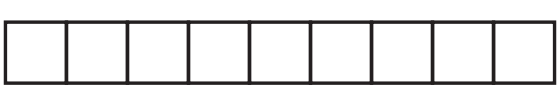
A. 5 helmets

B. 6 helmets

C. 7 helmets

D. 8 helmets

8 Measure the length of the black line using squares. How many squares long is the black line?



A. 9 squares

B. 10 squares

C. 11 squares

D. 12 squares

9 Tekia and Meadow used the same water bottle but had different yoga mats. They wanted to see who had the wider yoga mat. They measured their yoga mats using their water bottles. How many water bottles wide are each of the yoga mats?

Tekia's Yoga Mat

Meadow's Yoga Mat

A. Tekia's yoga mat is 3 water bottles wide and Meadow's yoga mat is 4 water bottles wide.

B. Tekia's yoga mat is 4 water bottles wide and Meadow's yoga mat is 5 water bottles wide.

C. Tekia's yoga mat is 5 water bottles wide and Meadow's yoga mat is 3 water bottles wide.

D. Tekia's yoga mat is 4 water bottles wide and Meadow's yoga mat is 3 water bottles wide.

10 Measure the length of the scissors using paper clips. How many paper clips long are the scissors?

A. 5 paper clips

B. 6 paper clips

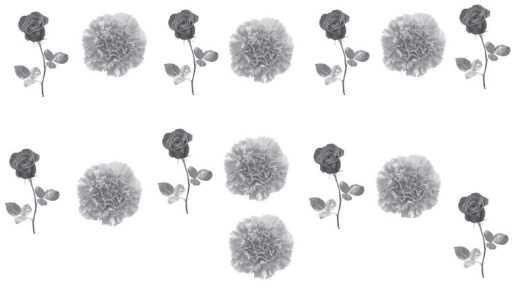
C. 7 paper clips

D. 8 paper clips

Practice 44 Organize Data

1.MD.4

1 Which table represents the number of carnations and roses shown?



A.

Flowers	
Carnations	6
Roses	8

B.

Flowers	
Carnations	7
Roses	8

C.

Flowers	
Carnations	6
Roses	9

D.

Flowers	
Carnations	7
Roses	9

2 Which table represents the number of hard hats and top hats shown?

A.

Hats	
Hard hats	12
Top hats	13

B.

Hats	
Hard hats	11
Top hats	13

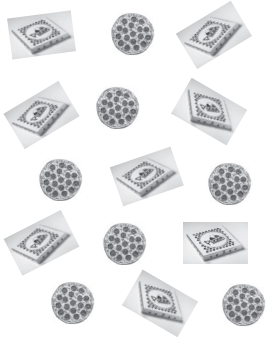
C.

Hats	
Hard hats	11
Top hats	12

D.

Hats	
Hard hats	12
Top hats	12

3 Drew needs to see if there are enough pizza boxes for his delivery. Each box holds one pizza. Count the items. Does Drew have enough boxes?



A. Yes, because there are more boxes than pizzas

B. Yes, because there are more pizzas than boxes

C. No, because there are more boxes than pizzas

D. No, because there are more pizzas than boxes

4 Clyde uses tally marks to take an inventory of the supplies in his cabinet. Which table represents the data given in the tally chart?

Books 𝍸 𝍸

Staplers 𝍸

Markers ||||

A.

Supplies	
Books	10
Staplers	5
Markers	5

B.

Supplies	
Books	12
Staplers	6
Markers	4

C.

Supplies	
Books	10
Staplers	5
Markers	4

D.

Supplies	
Books	9
Staplers	5
Markers	4

5 Kori is cleaning out her shed for a yard sale. She uses tally marks to take an inventory of the items in her shed. Which table represents the data given in the tally chart?

Scooters 𝍸 |

Bikes 𝍸 𝍸

Wagons 𝍸

Skateboards |||

A.

Shed Contents	
Scooters	7
Bikes	10
Wagons	5
Skateboards	3

B.

Shed Contents	
Scooters	8
Bikes	12
Wagons	6
Skateboards	3

C.

Shed Contents	
Scooters	7
Bikes	12
Wagons	6
Skateboards	3

D.

Shed Contents	
Scooters	8
Bikes	10
Wagons	5
Skateboards	3

6 Selena uses tally marks to take an inventory of the vegetables she has. Which table represents the data given in the tally chart?

Green Beans ||||

Corn 𝍸 |||

Yams 𝍸

Carrots |||

A.

Vegetables	
Green Beans	4
Corn	9
Yams	5
Carrots	3

B.

Vegetables	
Green Beans	4
Corn	8
Yams	6
Carrots	3

C.

Vegetables	
Green Beans	4
Corn	9
Yams	6
Carrots	3

D.

Vegetables	
Green Beans	4
Corn	8
Yams	5
Carrots	3

7 The equipment manager of a recreation center uses tally marks to take an inventory of sports balls. Which table represents the data given in the tally chart?

Rugby balls 𝍸 ||||

Soccer balls 𝍸

Footballs ||||

A.

Sports Balls	
Rugby balls	9
Soccer balls	5
Footballs	4

B.

Sports Balls	
Rugby balls	10
Soccer balls	6
Footballs	3

C.

Sports Balls	
Rugby balls	9
Soccer balls	6
Footballs	4

D.

Sports Balls	
Rugby balls	10
Soccer balls	5
Footballs	4

8 Which table represents the number of watermelons, apples, and bananas shown?

A.

Fruits	
Watermelons	6
Apples	5
Bananas	6

B.

Fruits	
Watermelons	6
Apples	6
Bananas	6

C.

Fruits	
Watermelons	5
Apples	6
Bananas	7

D.

Fruits	
Watermelons	6
Apples	5
Bananas	7
